

BILIUM – Bilingualism Upgrade Module  
(September 2013 – June 2014)

Dear Colleagues,

For the purposes of international research into clarifying the situation with the phenomenon of natural multilingualism (the Leonardo da Vinci Project 2012-2014), we require information on courses, seminars, conferences and projects held at your educational establishment (or research centre). Being based in different countries, we are, unfortunately, not very well informed about important and interesting initiatives in the partner countries, which means that the way we are spending our financial and human resources lacks purpose.

The results of the survey will be included in an EU compendium, intended for distribution in the countries participating in the project (UK, FRG, Sweden, Switzerland, the Netherlands, Italy, the Czech Republic, France and Austria).

We thank you in advance for your assistance.
